New student enrollment

Ark Technological Institute Education System Incorporated · Lucena Branch

Setup comes first

Configure the fee schedule, school year, term, and valid section before registrar intake.

Annual balance

Only the scheduled entry-term tuition DP must be settled before confirmation; the full annual balance is not required.

Credential is private

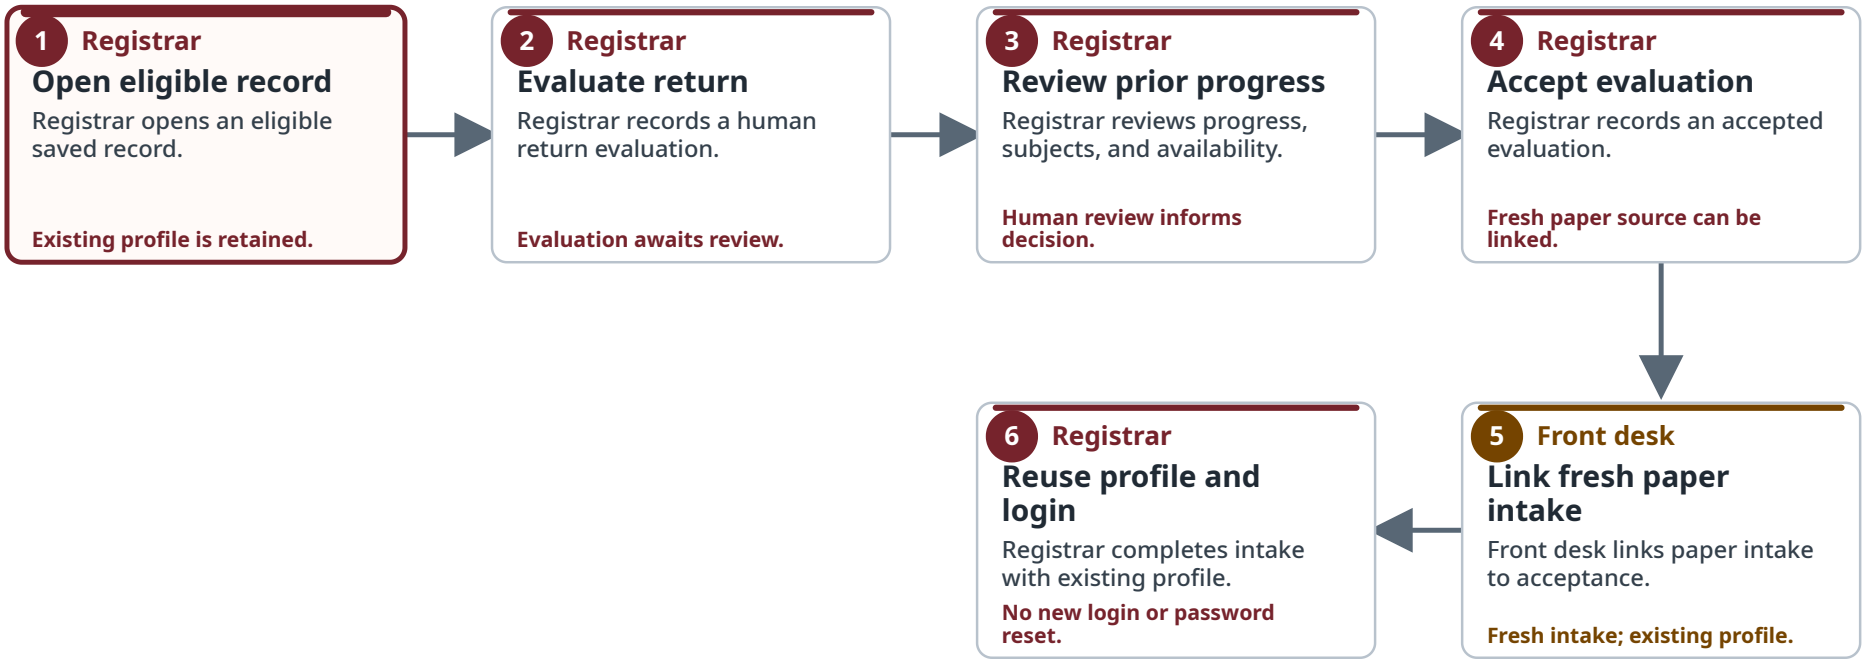

Final confirmation activates login. The password appears once privately, never by email. Email 2FA and password change follow.

Existing learners

Continuing learners reuse their profile and login. Prior paper clearance can gate activation. Interrupted returns require an accepted Registrar evaluation.

Return after a break

Ark Technological Institute Education System Incorporated · Lucena Branch

Human evaluation

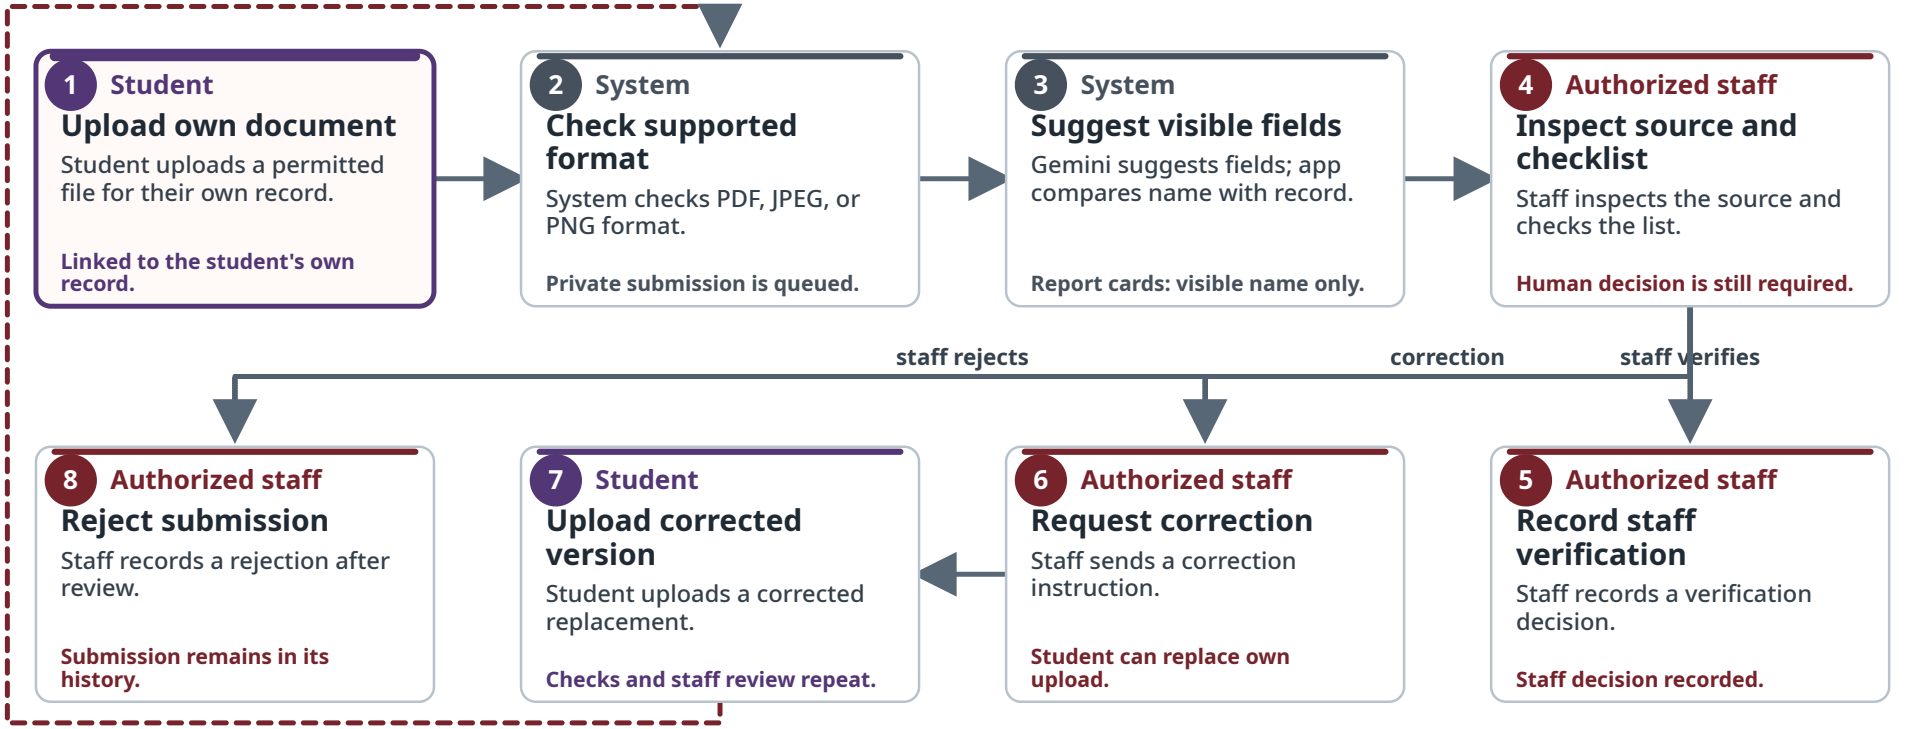

Prior progress, curriculum, required subjects, and availability inform the registrar's decision; no equivalency or admissions decision is automatic.

Account stays

The existing student profile and login are reused. This return path does not issue new credentials or reset the password.

Digital documents and staff review

Ark Technological Institute Education System Incorporated · Lucena Branch

AI boundary

Suggestions cannot prove authenticity, detect forgery, verify signatures or seals, or perform forensic analysis.

Report-card scope

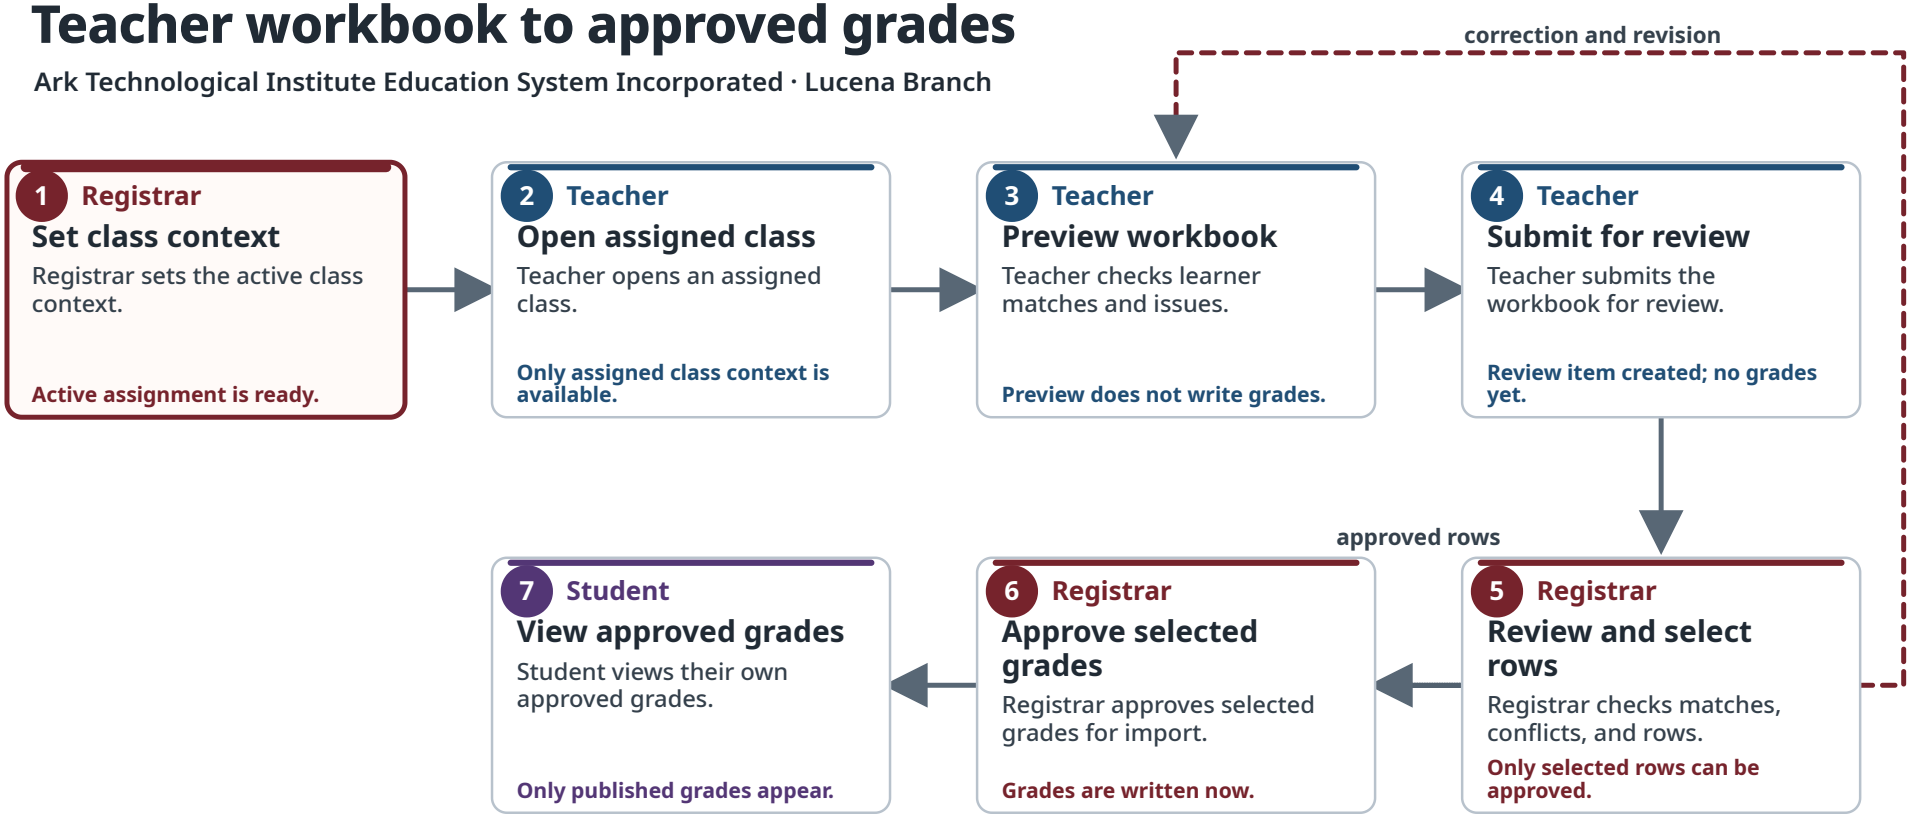

Visible student name and configured file format only. No grades, marks, subjects, attendance, or other academic results.

Provider unavailable

The submission remains reviewable. Staff can inspect it manually; verification after unavailable checks needs a reason.

Teacher workbook to approved grades

Ark Technological Institute Education System Incorporated · Lucena Branch

Correction path

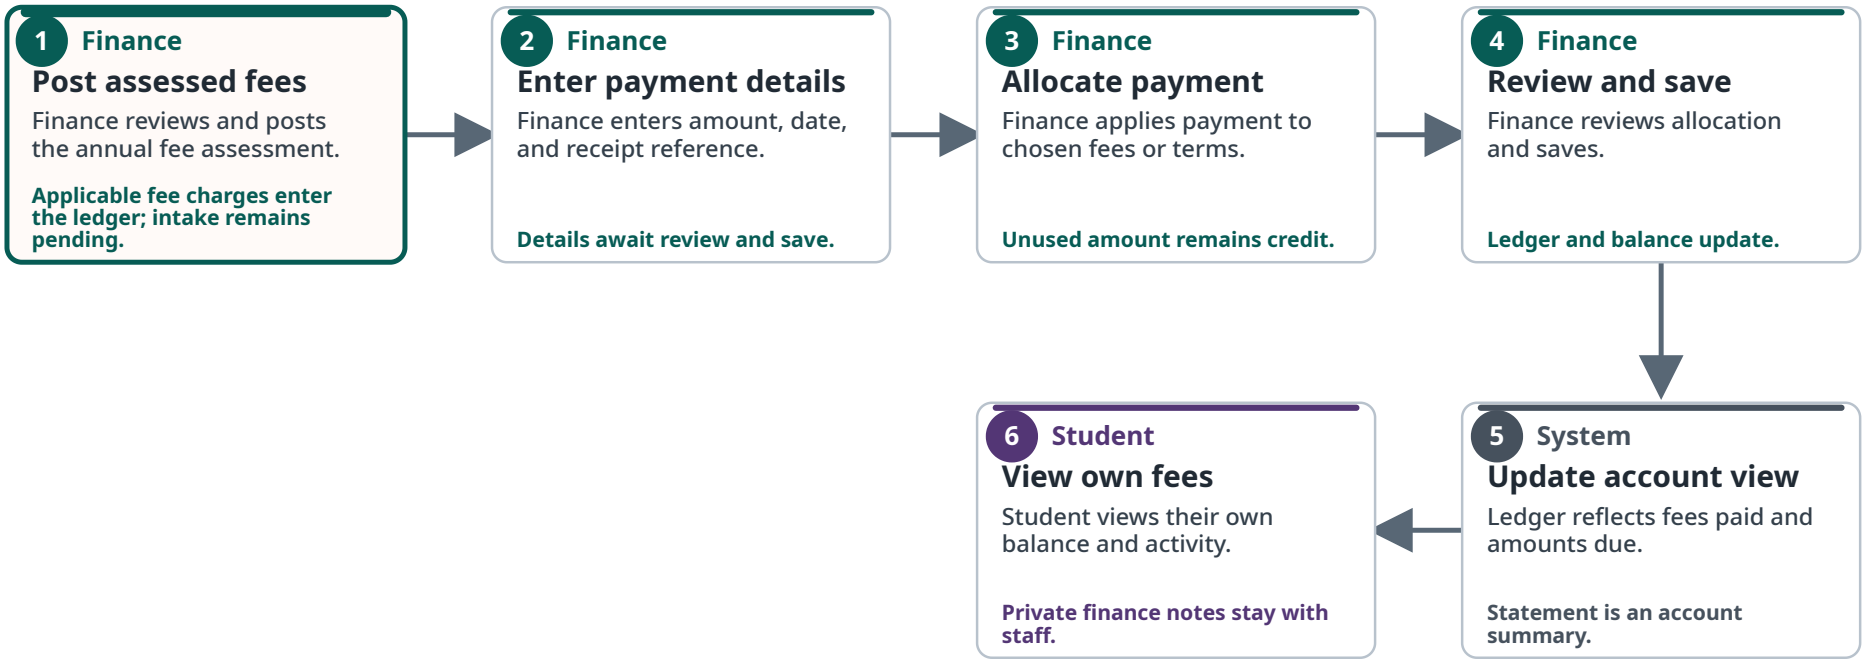

A registrar correction request returns a revised workbook through teacher preview and submission.

Grade source

Report-card scans, Good Moral, PSA, and Form 137 suggestions never write grades.

Assessed fees, payments, and balances

Ark Technological Institute Education System Incorporated · Lucena Branch

Credit is not new cash

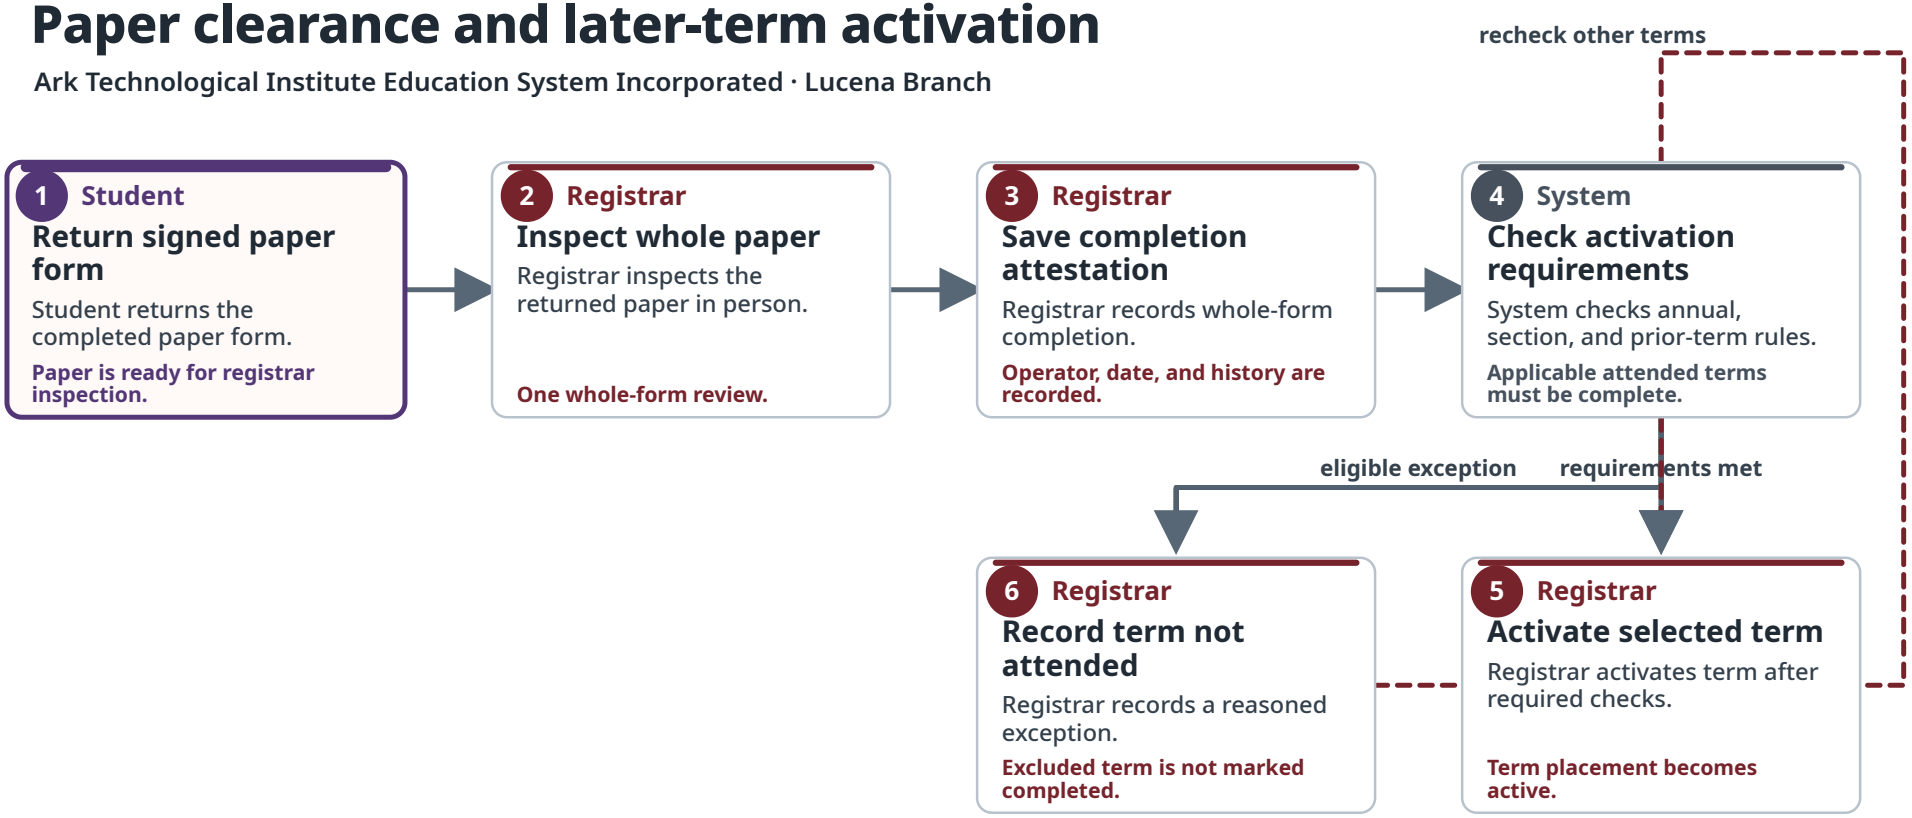

Applying existing credit does not record another payment. An unapplied amount remains credit.

Statement of Account

It is an account summary, not an official receipt. A reviewed payment arrangement does not erase debt.

Paper clearance and later-term activation

Ark Technological Institute Education System Incorporated · Lucena Branch

Whole-paper status

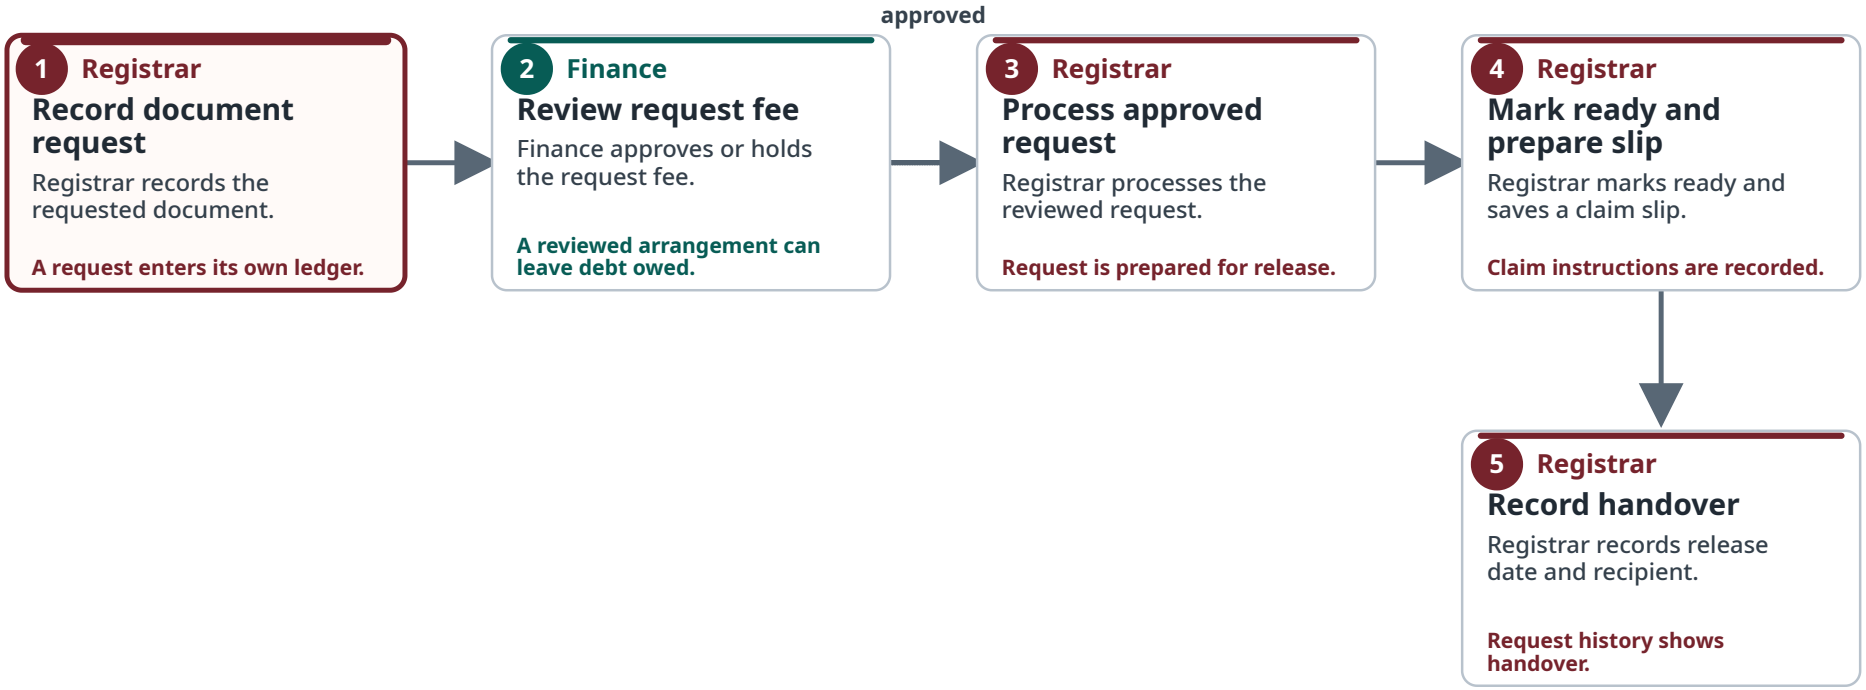

Current v2.018 workflow records one registrar attestation. v2.017 signature evidence remains historical and read-only.

Separate decisions

Paper clearance is separate from Finance term account clearance and document request fee review.

Document request and handover

Ark Technological Institute Education System Incorporated · Lucena Branch

If held

A Finance hold pauses processing until the fee decision is resolved.

Keep scope clear

This logs a request and handover. It does not generate or send a document file, and it is not term clearance.

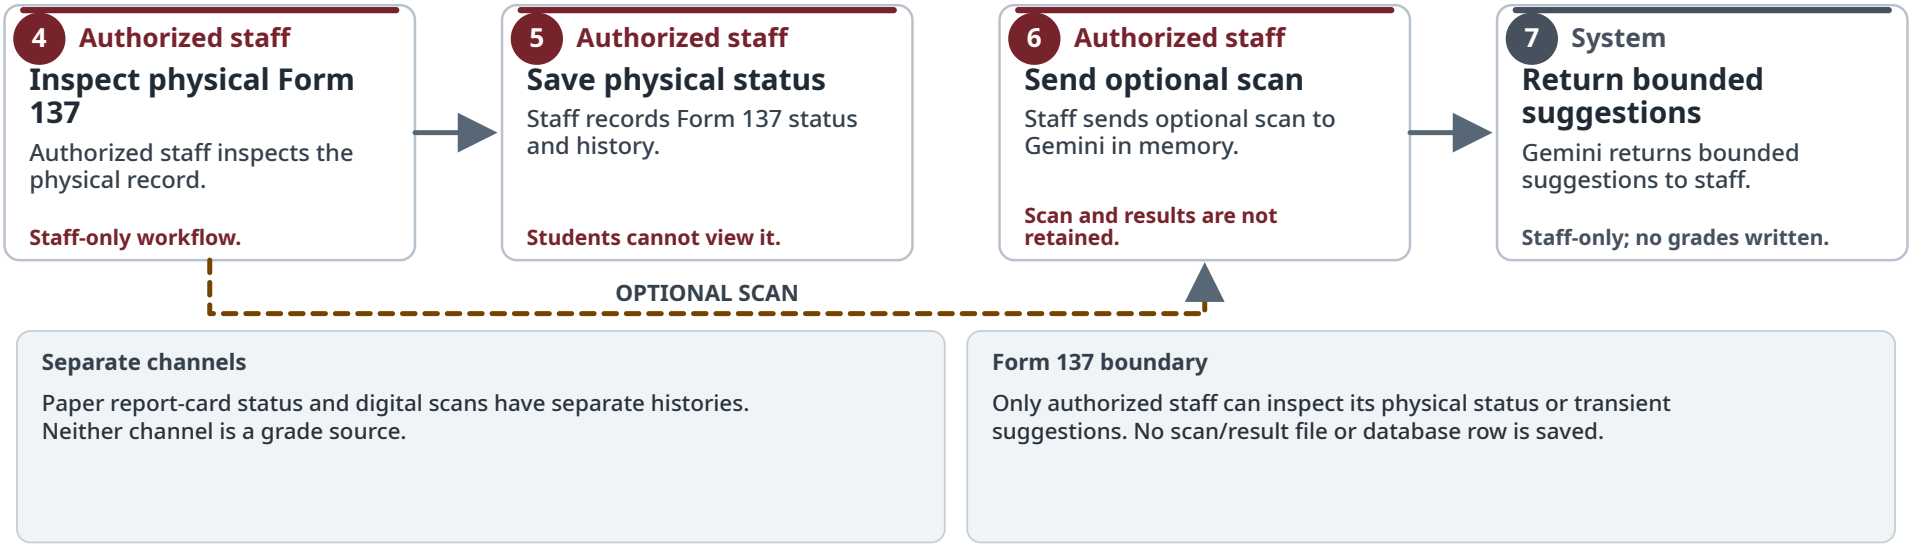

Physical report card and Form 137 records

Ark Technological Institute Education System Incorporated · Lucena Branch

Previous-school report-card paper copy

Form 137 physical record and optional scan

Separate channels

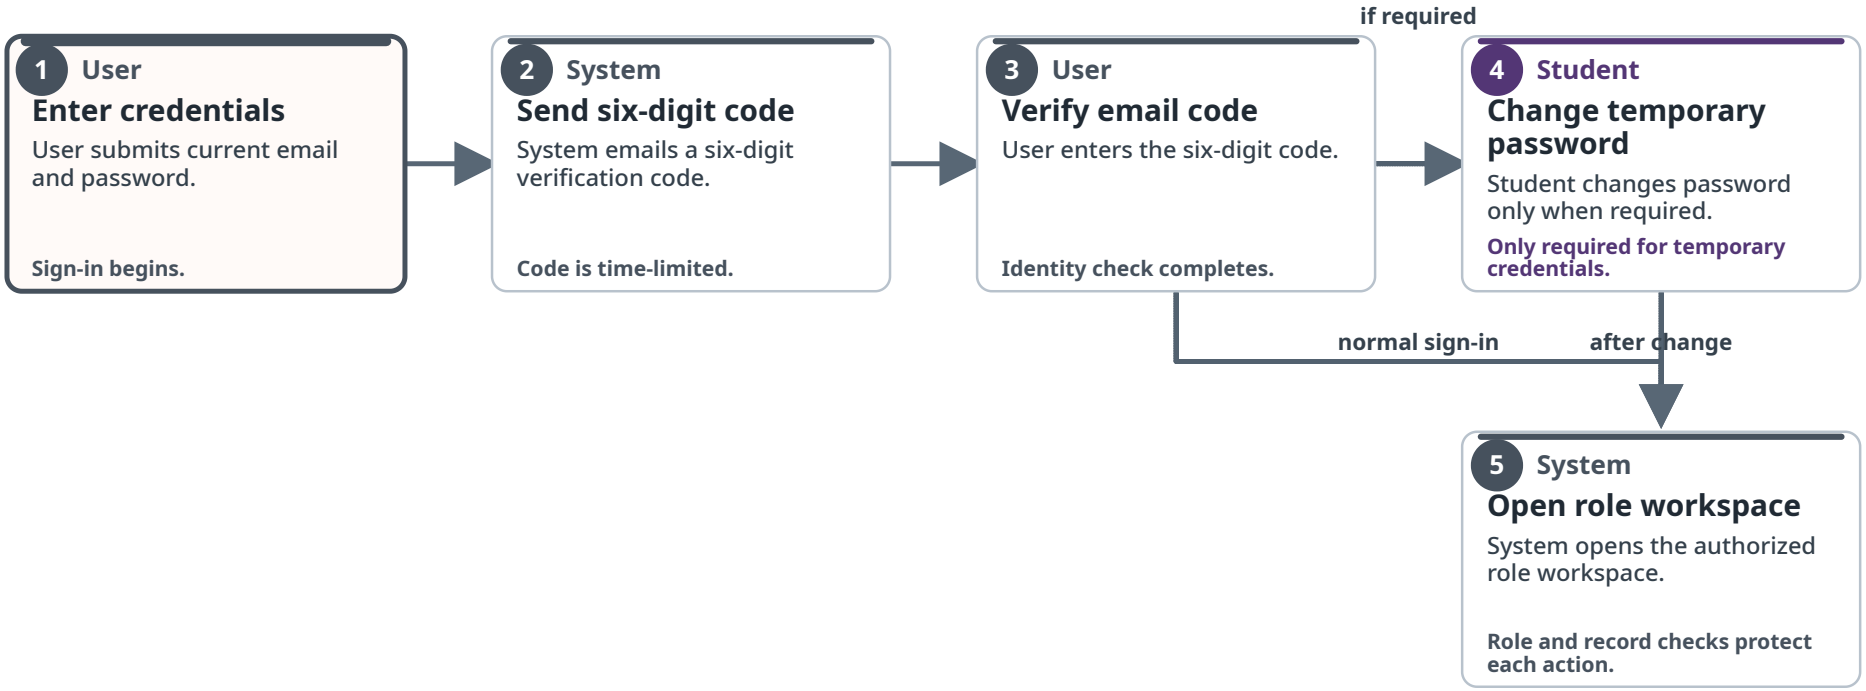

Paper report-card status and digital scans have separate histories. Neither channel is a grade source.

Form 137 boundary

Only authorized staff can inspect its physical status or transient suggestions. No scan/result file or database row is saved.

Sign-in and email two-factor authentication

Ark Technological Institute Education System Incorporated · Lucena Branch

Temporary password

The change step appears only when required, such as after first activation. It is not repeated for every login.

Access is checked

Role authorization and student-record ownership are enforced for protected actions on the server.

Who owns each part of the workflow?

Ark Technological Institute Education System Incorporated · Lucena Branch

Front desk	Transcribe paper intake and received-document counts.	**No student-master, document, finance, or account access.**
Registrar	Review enrollment, academics, documents, and grades.	**Owns enrollment and staff document and grade decisions.**
Teacher	Teach assigned classes; submit the corrected workbook.	**Submits only; registrar approves grades.**
Finance	Manage fees, payments, account clearance, and request fees.	**Owns finance decisions; does not enroll students.**
Student	View own records and upload permitted documents.	**Own records only; Form 137 is staff-only.**
Database admin	Manage accounts, audit activity, and oversee records.	**Oversight; cannot bypass grade approval.**

Ownership matters

Role checks protect each action. Front desk records paper intake and receipt counts only; it has no student-master, document-decision, finance, or account-administration access.
